

ANN-MARI OBERHOLZER

Software Engineer

ABOUT ME

I have completed my BSc Computer Science, with distinction, at the University of Pretoria. I am currently busy with my Honours in Computer Science this year at the University of Pretoria. With a foundation in computer science, I am now looking to extend my abilities in design, user experience and user research, as well as get a better understanding of what I can do with the knowledge I have.

EXPERIENCE

COS 132 and COS 212 Assistant Lecturer
University of Pretoria

February 2026 - June 2026

During this semester working as an assistant lecturer, I have acquired a variety of skills. I have gained experience in setting practical's and presenting class, as well as assisting in the development of tests and the grading thereof.

COS 301 Capstone and Mini Project
University of Pretoria

February 2025 - November 2025

During this year I learned a lot while working on both these group projects. I have gained experience on how to lead a group, as well as how to communicate with clients. I have learned how to navigate conflict in the workplace and how to communicate clearly and respectfully.

COS 132 and COS 221 Tutor
University of Pretoria

10 February 2025 – 30 June 2025

During this semester I have gained more experience in how to work in an environment where I can help others, as well as working with others to help student achieve their goals. I have gained experience in marking demonstrations of projects.

COS110 Tutor
University of Pretoria

22 July 2024 – 01 December 2024

During the semester I learned how to communicate clearly with students and how to help them understand a concept. I have gained experience with tutoring and marking class tests.

JCP: Computer Training at Mamelodi Campus
University of Pretoria

February 2024 – October 2024

During my holiday (8 July 2024 - 12 July 2024), my JCP team and I had to present a computer training course to community members at Mamelodi Campus. During this week I have gained experience in teaching people new things and having patience. I also learned how to approach matters in different ways to make a concept more understandable for people who struggle to grasp a concept.
